

HUTZ HOSPI-TEC:

The Hutz Group of Companies was founded in the 1970's by German Entrepreneur Wolfgang Hutz and as the business grew, so did its focus.

From initially concentrating only on lighting, the company expanded to include entities focusing on Medical Device Manufacturing (Hutz Medical), Hospital Refurbishments and Upgrades (Hutz Hospi-Tec) as well as an Engineering Division (Hutz Engineering).

In 1999, Hutz Hospi-Tec was established and concentrates on hospital projects, upgrades and refurbishments. Proudly South African, the company is a Level 2 BBBEE contributor and has its head office based in Port Elizabeth, with satellite offices run in other major city centres including Johannesburg, Durban and Cape Town.

MISSION:

To provide cost-effective, quality solutions to existing ailing medical facilities while meeting the necessary South African standards and requirements. This is to be achieved by:

- Customised solutions;
- Quality products & installation;
- Maintenance Plan;
- Experienced Project Managers & Contractors

Hutz Hospi-Tec aligns itself to the continuous improvement policy adhered to within the group; and which is a given in all aspects of our business and central to our stringent quality systems.

The following attest to this claim:

- ISO 13485 Certified;
- Member of SAFHE;
- Member of CEASA;
- SAPHRA Licence;
- BBBEE Level 2 Contributor;
- Official supplier of Hutz Medical products

VISION:

- To provide the quality solutions and meet the requirements of existing medical facilities that necessitate an upgrade or revitalisation of its infrastructure;
- To extend and tailor our services to suit requirements within the Healthcare Industry in South Africa.

CASE STUDY: UPGRADING OF LIVINGSTONE HOSPITAL

SURGICAL WARD IN PORT ELIZABETH, EASTERN CAPE

- Livingstone Hospital in Port Elizabeth required an upgrade to their Surgical Ward A;
- Internal work was completed but the existing structure was utilized.

LIST OF WORK COMPLETED FOR THE PROJECT:

- Bacterial count and analysis completed pre and post-project ;
- Ward stripped and repainted;
- New ceiling tracks and boards installed;
- New Bedhead Service Systems installed;
- Electronic Nurse Call System installed;
- Co-ordination and certification of ward's electrical supply;
- Co-ordination and certification of ward's gas supply;
- New patient information boards supplied;
- New mirror supplied and tiling completed around basin;
- Beds and bedside cabinets refurbished;
- Bacterial hand cleaning unit & hand-towel dispenser installed;
- New mattresses, curtains and linen supplied;
- Ward was cleaned and polished.

TESTIMONIALS & COMMENTS:

"The once dismal surgical ward was transformed into one resembling that of a private hospital"
Estelle Ellis_The Herald

"Thank you very much for the upgrade and renovation of a section of ward A1. It illustrates what can be done with a little innovation. We received a lot of positive feedback from the staff and public regarding the new look"
Enrico Gouws_ Deputy Director: Engineering (PEHC)

"It is so beautiful, we call it the 'Greenacres Wing'"
Sister Sybel
Adams_Livingstone Hospital

Public Health:
Hospital get long overdue upgrade!
The Herald

MAINTENANCE PLAN:

As part of the service, we implemented a system which will guarantee that the supplied product standard and product function is maintained.

The maintenance system included the following:

-  Training of resident maintenance staff;
-  Follow-up on previous findings;
-  Comprehensive report on current findings;
-  Access to supplier base.

FIX WHAT YOU HAVE: A SOUTH AFRICAN SOLUTION

As healthcare facilities within South Africa age and the needs of the surrounding communities which they service grow, so do the requirements for them to either be upgraded or refurbished to meet these needs. Hutz Hospi-Tec is a full-service medical infrastructure facilities company with selected industry professionals on board to enable hospital projects, revitalisation and refurbishment programmes.

These refurbishment projects involve the targeting of aged and/or ailing health infrastructures, such as clinics and hospitals, with the objective being to upgrade and revamp these facilities in a cost-effective and timeous manner; while providing quality medical solutions.

The Hutz Hospi-Tec Team encompasses a wide range of expertise, which assists in ensuring that the implementation of specific hospital requirements and standards are met, while providing a cost-effective solution. Working hand-in-hand with the local management of the government facility, our team is able to ascertain the direct needs of an existing hospital or clinic and tailor-make the refurbishment to meet the facility's specific requirements.

Operational staff at the hospital have direct involvement in the project execution, which also encourages a sense of pride and inclusion of the local community. We are able to put a public hospital on par with a private institution at a much lower cost than a newly built facility.

One of the benefits of the Hutz Hospi-Tec Refurbishment Programme include that it offers hospitals and clinics the opportunity to continue with the upgrading or refurbishing of certain wards while other areas still continue to service patients. We believe in giving back to the local community, through the use of local labour.

By providing the opportunity for training and skills transfer as well as empowering the local labour force, the resident community becomes involved in the project. We provide an effective and solutions driven maintenance plan for the facility, thereby encouraging the entrepreneurial growth of the labour market. When utilising the existing structure, no special permits are required prior to commencing the project and it remains a cost-effective exercise when compared to building brand new facilities.

WHY USE HUTZ HOSPI-TEC?

Hutz Hospi-Tec provides a cost-effective solution;

Focus on existing hospital wards;

Put the public hospital on par at a fraction of the cost;

Provide Training, Skills Transfer & Empower Local Labour;

Promote a platform for Entrepreneurial Growth;

Enhancement in the shortest time possible;

Provide an effective maintenance plan;

Project driven customised solutions.
